#### PROFILE

I am an ambitious and determined young programmer looking for development opportunities as a Junior Frontend Developer. I have a solid foundation in web technologies and a strong passion for creating modern, responsive user interfaces. I value effective communication, the team and I strive to constantly improve my skills in a dynamic IT environment.

#### **PROJECTS**

## Movie App

<React /> <TypeScript /> <Scss /> <Express.js />

Movie list management application built with TypeScript and React, featuring an Express.js backend and MongoDB database. Enables user authentication, registration, addition/deletion of movies from a list, and integrates with an external movie API.

#### Wordle game

<React /> <TypeScript /> <Scss />

The goal of the project was to replicate a game where players guess a randomly chosen word with a limited number of attempts. The game typically focuses on five-letter words.

### Portfolio website

<Next.js /> <TypeScript /> <Tailwind />

Portfolio website is a dynamic web application designed to showcase my skills and projects. It features a responsive design for compatibility with various devices.

#### Starmont website

<Next.js /> <TypeScript /> <React /> <Tailwind />

Starmont website is a one page app designed for my client. I integrated the Swiper library for handling dynamic sliders and incorporated the Google Maps API for seamless location mapping.
